Here's my question to General Dempsey:
With the Federal Reserve Note weakening against other currencies, 25% of international trade no longer denominated in US dollars, and the US credit rating on the verge of being lowered by the new Universal Credit Rating Group, do you think it is time to accept the offer of the authorized signatory to the Global Collateral Account to release the uncut dollars issued by the US Treasury department and back them with the 170,500 metric tonnes of gold on deposit in the Bank of Hawaii?https://s3.amazonaws.com/khudes/embennell.docx

A growing number of citizens in the United States and in the Philippines are reclaiming their history. They no longer wish to see their taxes go to the City of London and the Vatican. They are reclaiming their Constitutional rights.

This should make it clear to you that your ultimatum to me that I "provide [my] intentions and the list of Governors and their alleged intent or rights by return" is of null effect.

Sincerely,
Karen Hudes
Acting General Counsel
International Bank for Reconstruction and Development

Karen, It's Shelley Bolling working with Dr. Hendo Henderson. The rule of law that these 196 nations have signed off on is Omni Law, which for the US takes us back to our original organic Constitution. Yes, the Vatican is not in charge and never will be. We were the ones working with the International Criminal Court of Justice who tried the Pope and Queen of England last October on human sex trafficking and global financial terrorism, of which they were found guilty on all charges as you well

know. The Vatican is being dismantled, and Elizabeth has been dethroned, although to look through the eyes of the main stream media you wouldn't necessarily know that. It was because of this case that Pope Benedict stepped down, and that Pope Francis has not moved into the Papal apartments. The Vatican is not counted as one of the 196 nations.

Yes, there will be no release of funds without full accountability. There is complete accountability, as the Executor, Dr. Henderson and the Fiduciaries, have filed all legal and accounting paperwork with the World Court on down to the local levels with all 196 nations. Dr. Henderson was the one who wrote Omni Law and took it to the World Court in 1983 to be filed. It passed the test of time without any objections and officially became law in 1998, because Dr. said they would go beyond the 7 year statute to 15 years without objection.

I know I'm just a lay person trying to explain to an attorney what we have accomplished, but we do have many attorneys, accountants, scribes, fiduciaries, custodians and stewards making sure everything is filed and processed according to the rule of law and responsible accounting procedures. I have copies of the main documents and as Dr. Hendersonallows me to, I will forward these to you at the appropriate time.

I can't imagine the harassment you have gotten from so many people and the MSM, but know that we are very thankful for what you are doing, as it dovetails beautifully into what we are doing. We are actually working together, although on different sides of the largest project ever for mankind. I know that as you get to know us, you will feel much more comfortable about what we are doing. I certainly respect you being cautious as we are as well. However, the works of your hands that we have seen, have proven to us that you are a woman of integrity and with a heart for the truth. Please allow us the same courtesy as you will see going forward that the works of our hands will prove our integrity and heart to you.

Best regards,

Shelley Bolling

I have every right to talk for the People of the Philippine Islands as at refers to their Global Assets for at least about 30 million at present and growing daily (that also is the number set by President Marcos to access the Global Assets and the Accounts.

If you do not want to disclose what rights you may have I can only assume that you want to support the cry for something like Bretton Woods to be placed into force again after Nixon abandoned Bretton Woods in 1971 and possibly since the Global Financial Crisis of 2008 following the loss of the Global Assets belonging to the People of the Philippine Islands came into force.

Your 188 Governors have no right to participate in those assets unless an Agreement is reached with the People of the Philippine Islands with all the right documentation in hand to prove ownership. The People of the Philippine Islands who invited me to assist, have that documentation. Further the International Court of Justice has ruled 14th September 2006 that no other nations or Country can assert their right of the Global Assets and are forever considered Null and Void as attached. I know Wolfgang has had this copy previously from me but didn't want to consider as it was "Snow Pecked".

It seems if you are putting your hand up for the 188 Nations and want to pursue that course further, it may be necessary to go again to the International Court of Justice with the People of the Philippine Islands Lawyers so you can get it clear in your mind that you have no rights to the Global Accounts.
Please provide your intentions and the list of Governors and their alleged intent or rights by return.
Regards
